

## **PRESS RELEASE**

### **Lezzy Osbourne – *Black Widow's Web***

*Out now — October 31, 2025*

*Music video premieres November 7, 2025*

From the shadows of Edmonton, Alberta, queer singer-songwriter **Lezzy Osbourne** returns with *Black Widow's Web* — a haunting acoustic tale of seduction and danger. The track weaves ghostly guitar plucks and hypnotic vocals into a darkly cinematic soundscape.

Written, recorded, mixed, and mastered entirely by Lezzy herself, the track spins a haunting story of beauty that lures and destroys, like the spider it's named after. *Black Widow's Web* captures the moment when intuition warns but is blinded by attraction.

While her debut acoustic single *Etched Within My Flesh* introduced audiences to Lezzy's raw emotional depth, *Black Widow's Web* unveils a more mysterious and playful side of her artistry.

A visually stunning and provocative **music video** will follow on **November 7**, pulling viewers deeper into the song's eerie, alluring world. The Halloween-themed campaign invites listeners to embrace both the beauty and the bite of Lezzy's storytelling.
